

Did you know...

primary care providers can bill for outcome measurement?

CPT 96127 allows providers to bill for outcome measurement: “brief emotional/behavioral assessment (depression, ADHD, and others)”.

- ✓ Do not have to be a behavioral health provider
- ✓ Was created for use in primary care for patients with underlying mental health conditions
- ✓ Can be billed in telehealth context
- ✓ Can be billed in combination with CPT 99215
